

INSTRUCTIONS TO AUTHORS

MICOLOGIA APLICADA INTERNACIONAL publishes original and review papers on all aspects of applied and economic mycology. Biochemistry, entomology, ecology, economics, food technology, genetics, molecular biology, morphology, nutritional value, nematology, pathology, pharmacognosy, pharmacology, physiology, production management, computer programs and hardware, and other areas of applied mycology are of interest.

Preparation of manuscripts should be in accord with the latest issue of the most recent *CBE Style Manual*. Authors are encouraged to have at least two colleagues critically review their manuscript, before submission to **MICOLOGIA APLICADA INTERNACIONAL**.

Cover Page: A cover page should be provided with title, authors' names and addresses, other contact information, foot notes referring to title or authors. Number all succeeding pages in sequence.

Second Page: Repeat the title, but do not give any indication of the identity of authors. We will not give reviewers the names of authors. The English abstract, beginning with "ABSTRACT" on the line preceding the text, keywords should be placed below the abstract. Choose keywords carefully, words not supplied as keywords will not be used in the subject index. Leave the remaining page blank.

Third Page: A "ZUSAMMENFASSUNG", "RESUME", or abstract in some other language may begin on the third page. Label in the same manner as the second page, but in the language used.

Begin your introduction on the page following the abstracts. The word "INTRODUCTION" should be on the line preceding the text. It is preferred that the authors not be identified in the text. Often the use of "I" or "we" followed by a reference will make the best sentence and is acceptable. However, the editor may remove identifying references, for blind-review purposes. Be certain to identify properly the species being used in the introduction or material and methods section. The taxonomic authority should be included when it is first mentioned, but not subsequently, except to avoid some apparent confusion.

Headings: It is expected that all original papers will have ABSTRACT (and in other languages), MATERIALS AND METHODS, RESULTS, DISCUSSION, and LITERATURE CITED headings. RESULTS and DISCUSSION may be separate or combined. Those headings will be in uniform type throughout the journal. Headings in review articles may be more varied.

Paragraphs: All paragraphs must be indented.

Figures: Photos, graphs and line drawings are all to be numbered as figures and described on a separate legend page. In the text, they should be referred to with the abbreviation "Fig.". Submission and handling is quite different.

Photos. All photos must be mounted on heavy illustration board to avoid damage. They must be on glossy paper and they should be as sharp and contrasty as possible. There is no charge for black and white figures. Color photos can be included as actual photos to give extremely high quality reproduction. The cost is less than printing by color separation, but the author will be billed about USD \$ 300 for each page.

Graphs and line drawings (no extra charge). If possible, submit graphs and line drawings as TIFF, PC-Paintbrush PCX, JPEG or as W* spreadsheet files. We can convert many other formats. If you can not supply a standard computer format, submit a carefully made copy on paper, mounted as photos (but not combined with photos on the same board). If you supply graphs as hand-drawings, also submit all the data shown in a table. If you use a program that does not allow superscripts, subscripts or other needed font changes, supply your graph as a spreadsheet file. Also supply a paper copy of your graph and note needed changes with red ink. You will be sent a proof of the final graph.

Tables: Use a minimum of lines, and no vertical lines. Tables may be submitted as RTF, WKS, WK1, WK3, WQ1 or WQ2 files, but it is always wise to submit paper copies as well. They need not be mounted.

Statistical analysis: Strongly encouraged.

Literature Cited: Literature should be organized alphabetically by the authors' names. When there is more than one publication by the same authors, the older publications should be listed first. The citations in the text should be by numbers placed superscripts at each point of citation. Examples of citations by type of publication:

Books:

Chang, S. T., J. A. Buswell and P. G. Miles. 1992. *Genetics and Breeding of Edible Mushrooms*. Gordon and Breach, New York. 374 pp.

Brief articles

They should normally not exceed 6 typewritten pages, including tables and figures. They should be organized in the same order as a full length manuscript. It should have a Literature Cited section, but no other section headings.

Potpourri

This section is open to all contributions of interest to mushroom scientists. The primary limitation is that no contribution may occupy more than one printed page. Contributions will not be submitted to referees, but they must appear to benefit subscribers. News, opinions and book reviews are some possible subjects.

Submission of Manuscripts

It is preferred that manuscripts be submitted on floppy (computer) disks or CD. One copy of the text should be in Rich Text Format (RTF) or "pure ASCII" (8-bit) format. Only courier or default printer type should be used. However, words to be italicized may use the word processor to make them either underlined or italicized. Only one paper copy is required for text. Most well-known word processor formats are acceptable, but RTF is preferred. Do not include figures or tables in the text file.

Those who do not have computers must submit three copies on A4 or U.S. letter paper (21.6 x 27.9 cm). Margins must be at least 2.5 cm at the top and both sides. It must be double spaced and no more than 27 lines per page. At least one copy must be an original, typed with a fresh ribbon. Typed manuscripts will require extra time to process and proofread. Poorly typed manuscripts may have to be rejected, but at a minimum will require much more time to process. Only one space should be used between words and sentences. Do not right justify any copy of the manuscript. Do not hyphenate words at the end of lines. Do not double-space lines or provide margins on any floppy disk copy.

Carefully read the information under preparation of figures and tables, before submitting.

Print a copy of your manuscript from the floppy disk or CD that you submit, just before you send it to the editor. Every file on the disk should be checked. Computers do make errors and the editor can not correct them. If you send files that you are not equipped to print, the same information should be sent in another form.

E-mail submissions

Manuscripts may be submitted by e-mail; however, the rules for submission format must be more restrictive than for submissions with a paper copy. Text may be only in RTF or ASCII. Manuscripts written in MS-Word DOC are not acceptable by e-mail, and will be rejected. Figures: graphs and photos must be sent as separate attachments. The monochrome JPEG (JPG) format is preferred for photos, line drawings may be PCX, TIFF or similar formats (ideal total dot width is usually 900 to 1000 for line material and more for photos).

Send to: <kurtzmanr@earthlink.net> or <dcarrera@colpos.mx>.

Manuscripts are normally submitted by geographic origin, but may be sent to either Editor:

For English speaking, northern Europe and south Pacific (by ordinary airmail or priority mail):

R. H. Kurtzman, Jr., Editor
MICOLOGIA APLICADA INTERNACIONAL
445 Vassar Avenue
Berkeley, CA 94708
